Abdul Hanan (Lead)

GitHub: Abdulhanan535 | Module: Dashboard & Reports + Base

GUI Work

- DashboardGUI - main SPA frame with CardLayout navigation
- Sidebar navigation with color-coded module buttons
- Stat cards (builds, revenue, avg score, bills)
- Module cards linking to each section

Backend Work

- DBConnection - singleton JDBC connection
- Stats loading and refresh logic
- Cross-module data integration

Database Work

- Schema design (builds, gpu_options, bills)
- Seed data (184 builds + 59 GPU options)
- Added GPU options for all budget tiers (50k-150k)

Integration & Bug Fixes

- Wired all modules into dashboard
- Stats auto-refresh when returning to dashboard
- Fixed billing to use budget selector
- Added build deletion after purchase
- Fixed form alignment in BuildCatalog and GPUUpgrades
- Added missing fields to GPU form
- Fixed purchase filter to exact budget match
- Fixed GPU options to link to exact budget tier

Haroon Ikram

Module: Build Catalog | Branch: haroon-build-catalog

GUI Work

- BuildCatalogGUI - table with build listings
- Form for add/update/delete/clear operations
- Color coding: CPU (Intel=blue, AMD=red)
- Color coding: GPU (Nvidia=green, AMD=orange)

Backend Work

- BuildDAO with full CRUD operations
- getBuildsByBudget() for filtering
- Input validation (budget multiples of 5k, score 0-120)

Bug Fixes

- Fixed GPU brand filter - added action listener
- Added filterByBrand() method

Database Work

- builds table design and 184 seed records

Aitzaz

Module: GPU Upgrades | Branch: aitzaz-gpu-upgrades

GUI Work

- GPUUpgradesGUI - GPU options table
- Brand filter dropdown (All, Nvidia, AMD)
- Form with labels above each field

Backend Work

- GPUOptionDAO with full CRUD operations
- getGPUsByBrand() for filtering
- getGPUsByBudget() for purchase integration
- Negative price prevention

Database Work

- gpu_options table design and seed records

Ahmad

Module: Billing | Branch: ahmad-billing

GUI Work

- BillingGUI - bill history table
- Budget selector dropdown (50k-500k)
- Purchase workflow with GPU upgrade dialog
- After selecting build, GPU options for that budget are shown
- Receipt display with final price including GPU upgrade

Backend Work

- BillDAO with full CRUD operations
- Revenue and bill count tracking
- Fixed UTF-8 encoding
- Added deleteBill() method

Database Work

- bills table design with foreign key to builds

Git Summary

Member	Commits	Key Work
Abdul Hanan	25+	Dashboard, integration, bug fixes
Haroon Ikram	8+	Build Catalog CRUD + filter fix
Aitzaz	5+	GPU Upgrades CRUD + filtering
Ahmad	7+	Billing CRUD + GPU upgrade option
